

ENABLING SEAMLESS CONNECTIVITY AT ALLY BUILDING SOLUTIONS

CLIENT:

Ally Building Solutions

INDUSTRY:

Building Supply

SIZE:

Multi-location Business

LOCATIONS:

9 Locations Across Florida

CHALLENGE

Improving Network Performance Across Diverse Locations

A new director at Ally Building Solutions sought a clear view into the organization's existing network infrastructure. With 9 locations—ranging from very small offices to large operational hubs—Ally needed a comprehensive assessment of their Meraki environment to identify misconfigurations, address unique site needs, and develop a unified but flexible strategy moving forward.

"I can't say enough about the Viyu team — they're simply outstanding. Every project, from our Meraki deployment to ongoing support, has been handled with unmatched expertise, creativity, and attention to detail. They don't just provide solutions — they anticipate needs, solve problems before they happen, and make us feel like we're their only client. Viyu isn't just a vendor; they're a true partner and an essential part of our success."

JIM NORMAN
Ally Building Solutions

SOLUTION

Onsite Assessment, Strategic Remediation, and Expert Execution

Viyu conducted a detailed Meraki assessment across all locations to uncover existing gaps and inconsistencies. Despite being based in Texas, Viyu's team, traveled to Florida to perform onsite evaluations and implementation—demonstrating that Viyu supports clients wherever they are located.

The solution included:

- Developing and deploying site-specific configurations aligned with Meraki best practices
- Reconfiguring infrastructure to meet individual location requirements while maintaining centralized control
- Delivering a tailored training session on Meraki's Cloud Management Platform to ensure long-term self-sufficiency for Ally's internal IT staff

OUTCOME

Optimized Infrastructure and a Trusted Technology Partner

Viyu successfully reconfigured each of Ally's locations to operate on a streamlined, secure, and scalable Meraki infrastructure. The client now relies on Viyu for:

- Ongoing procurement, professional services, and managed services
- Project scoping and implementation as they continue their aggressive acquisition strategy
- Continued knowledge transfer and training as their network evolves
