

HOW A FINANCIAL SERVICES FIRM OPENED A FULLY NETWORKED OFFICE SUITE—ON TIME AND ON POINT

CHALLENGE

When this financial services firm needed to expand into a new office, they turned to Viyu to ensure the space would be fully connected, secure, and ready for business.

With a tight move-in timeline, they required expert consultation, quick coordination across multiple vendors, and seamless integration of a new network infrastructure that would support their daily operations.

"We were extremely grateful to have Viyu on our corner for this office expansion. Their expertise and knowledge helped the entire process smoothly and efficiently"

SOLUTION

Viyu led the full network design and implementation for the new suite:

- **Sourced and staged Fortinet hardware** (firewall, switches, APs, UPS)
- **Completed predictive wireless survey** for optimal AP placement
- **Brokered Internet circuit** via master agent relationships
- **Oversaw IDF design** and new suite network setup
- **Collaborated on cabling design** and TV/data wall planning
- **Delivered detailed SOWs**, labor estimates, and a fully scoped BOM, ensuring transparency across all project phases.

OUTCOME

With proactive planning and tight coordination, Viyu delivered:

- **A Fully Functional Network Suite:** Complete Fortinet infrastructure installed, staged, and tested ahead of move-in.
- **On-Time Delivery:** Project completed in full prior to the customer's scheduled team relocation.
- **Seamless Integration:** The new infrastructure aligned perfectly with existing systems, minimizing disruption.
- **Informed Decision-Making:** Viyu guided the customer through key decisions—ultimately selecting Fortinet over Meraki due to availability and alignment with long-term needs.
