

ALWAYS ON: HOW OHT PARTNERS STRENGTHENED BUSINESS CONTINUITY WITH VARIDA CLOUD

CHALLENGE

OHT Partners' Austin office, along with other locations, occasionally faced power interruptions that created uncertainty around system availability. While the business managed to work through these disruptions, leadership recognized the growing need for a more resilient infrastructure. They sought a solution that would ensure consistent access to critical applications, minimize risks associated with local outages, and create a foundation capable of supporting ongoing operations and future growth.

SOLUTION

Viyu partnered with OHT Partners to migrate their production servers from aging on-premises hardware to the secure vArida private cloud. This solution provided:

- SOC 2 Type II Compliance – Ensuring enterprise-grade security and governance.
- High Availability & Redundancy – Delivering reliable access to critical systems regardless of local conditions.
- Scalability for Growth – A flexible platform designed to expand with the business.
- Reduced Dependence on Local Infrastructure – Eliminating vulnerabilities tied to on-site hardware.

OUTCOME

With vArida, OHT Partners now operates on an "always on" infrastructure that:

- Ensures business continuity across all offices and markets.
- Provides a secure, stable environment for critical applications.
- Reduces risks of disruption from power interruptions or localized outages.
- Positions the organization for future growth with flexible, enterprise-ready infrastructure.

This proactive migration gave OHT Partners confidence in their IT foundation—delivering both immediate reliability and long-term assurance.
