

# MODERNIZING CRITICAL COMMUNICATION INFRASTRUCTURE FOR LONG-TERM STABILITY

## CHALLENGE

Mission Foods lacked in-house expertise to manage and maintain their voice and collaboration platforms. Aging switches and outdated infrastructure required expert design, upgrades, and ongoing troubleshooting to avoid disruptions and security risks.

Without a trusted partner, Mission Foods faced increased operational risk, delayed modernization efforts, and limited scalability.

## SOLUTION

Viyu partnered with Mission Foods to modernize and stabilize their voice and network environment.

- Designed and implemented new Cisco Unified Collaboration platforms
- Upgraded and modernized Cisco switch infrastructure
- Provided ongoing maintenance, configuration, and troubleshooting

Viyu integrated seamlessly with existing systems while delivering expert, long-term support.

## OUTCOME

With Viyu as a consistent technology partner, Mission Foods gained a secure, modern, and scalable IT foundation.

- Successfully upgraded voice and switch infrastructure
- Improved security, reliability, and performance
- Enabled business scalability and long-term stability

Today, Mission Foods relies on Viyu as a trusted partner to maintain and optimize their Cisco voice, collaboration, and networking environment.
