

# FROM BID TO BUILD: DELIVERING A SEAMLESS IT CUTOVER FOR A NEW FACILITY

## CHALLENGE

Playful Studios is a creative technology company that required a modern, reliable IT foundation to support operations in a brand-new headquarter office. As part of a competitive bid process, Playful Studios selected Viyu to design and implement their entire infrastructure from the ground up.

Moving into a new building required a full cutover to brand-new IT infrastructure. Playful Studios needed a trusted partner who could handle everything—from design and procurement to implementation—without disrupting business operations or delaying occupancy.

Without the right partner, Playful Studios risked project delays, increased costs, and infrastructure gaps that could impact productivity from day one.

*“Viyu handled everything—from design to cutover—giving us a resilient, cloud-managed environment so we could focus on running our business.”*

## PLAYFUL STUDIOS

## SOLUTION

Viyu delivered an end-to-end infrastructure solution, managing every phase of the project.

- End-to-End Design, Procurement, and Implementation
- Viyu handled all labor and procurement, designing logistics and executing a seamless cutover into the new facility.
- Hosted IP Voice Solution
- Viyu designed and implemented a hosted IP voice platform, providing flexibility, reliability, and ease of management.
- Cloud-Managed Network Infrastructure
- Viyu built out a fully cloud-managed network for Playful Studios’ headquarters, delivering resiliency, high availability, and simplified administration.

## OUTCOME

With Viyu’s expertise, Playful Studios launched their new headquarters with a modern, cloud-managed IT environment.

- Highly resilient and flexible infrastructure
- Improved availability and simplified management
- Faster deployment with reduced project risk
- Time and cost savings that allowed the team to focus on their business
