

FROM MANAGED SERVICES TO CLOUD TRANSFORMATION: PROVIDENCE ENERGY & VIYU

A PARTNERSHIP BUILT ON TRUST AND STRATEGY

For over a decade, Providence Energy has partnered with Viyu as their trusted IT provider. Acting as an extension of their organization, Viyu delivers full managed services across users, networks, and infrastructure—ensuring secure, reliable operations and long-term scalability.

“Viyu operates as an extension of our team, delivering reliable, secure IT support and strategic guidance that has scaled with our business for over a decade.”

PROVIDENCE ENERGY

EVOLVING TOGETHER

This long-standing partnership has focused on modernizing Providence’s IT environment while maintaining strong security and business continuity. Viyu provides comprehensive managed services, including workstation procurement, imaging, deployment, and lifecycle management.

Viyu also guided Providence through key modernization initiatives, including a Microsoft 365 migration and a full transition of server workloads and production systems to the cloud. Today, Providence leverages Viyu’s vArida platform for Infrastructure as a Service (IaaS), Backup as a Service (BUaaS), and Disaster Recovery as a Service (DRaaS).

Additional improvements included migrating to a modern UCaaS/VoIP solution and brokering ISP circuits for headquarters to support performance, reliability, and growth.

RESULTS THAT LAST

Today, Providence Energy benefits from:

- A Secure, Cloud-First IT Environment
- Reliable, Fully Managed Operations
- Improved Resilience and Business Continuity

With a modern foundation in place, Viyu continues to support Providence through:

- Ongoing managed services and proactive optimization
- Continuous security enhancements
- Strategic IT planning aligned with future growth

Partner with Viyu to build a secure, scalable IT foundation for long-term growth.
