RANGER PLANT CONSTRUCTION MIGRATES TO VARIDA CLOUD FOR SCALABILITY AND SECURITY

CHALLENGE

Ranger Plant Construction was operating on legacy on-premise infrastructure that limited scalability, security, and operational efficiency. Leadership needed a flexible, reliable solution that could reduce the burden of maintaining physical servers while improving business continuity and positioning the company for growth.

"Viyu is a valued partner to Ranger Plant Construction. They resolve daily IT challenges efficiently, and special projects are handled with priority, expertise, and excellence. Their team consistently delivers exceptional service with the highest level of professionalism."

BRENDA BALL
RANGER PLANT CONSTRUCTION

SOLUTION

Viyu migrated Ranger Plant Construction's infrastructure to vArida Cloud Services, providing a modern, secure, and scalable platform. The migration included:

- Transitioning critical workloads from on-premise servers to vArida Cloud.
- Strengthening security and compliance with enterprise-grade protections.
- Simplifying IT management and reducing reliance on physical infrastructure.

The project was executed with careful planning to minimize disruption, ensuring continuity throughout the transition.

OUTCOME

By moving to vArida Cloud Services, Ranger Plant Construction gained a resilient IT environment that scales easily with business growth. The cloud platform improved system performance and security while eliminating the need to maintain and refresh on-premise hardware. IT teams now spend less time managing infrastructure and more time supporting business priorities. The migration not only reduced operational risks but also gave the company the agility to embrace future technology initiatives with confidence.

Ready to leave legacy systems behind? Trust Viyu and vArida Cloud Services to deliver secure, scalable infrastructure for the future.
