

BUILDING A STRONGER FOUNDATION: HOW AECGI ENHANCED NETWORK PERFORMANCE AND SCALABILITY

CLIENT:

Applied Economics Consulting Group

INDUSTRY:

Finance & Consulting

SIZE:

SMB

LOCATIONS:

United States

CHALLENGE

As AECGI continued to grow, their team recognized the need to strengthen their network to better support performance, remote connectivity, and future expansion. They were looking for a modern, secure, and centralized infrastructure that would simplify management and provide a reliable platform for continued success.

Ready to strengthen your IT foundation? Partner with Viyu to design a secure, scalable network that supports your growth, boosts performance, and keeps your team connected.

"The entire process was incredibly smooth. Viyu handled everything from design to deployment, and the end result has made managing our network easier than ever."

MATTHEW DETZEL

Applied Economics Consulting Group

SOLUTION

Viyu partnered with AECGI to deliver a comprehensive network modernization:

- Designed, staged, configured, and installed a standardized, scalable network infrastructure
- Completed cable management, VLAN setup, and full system documentation
- Provided hands-on training and cutover support to ensure a smooth transition
- Fully tested and integrated all hardware for centralized visibility and improved remote access

OUTCOME

With Viyu's expertise, AECGI gained a secure, high-performing network that empowers their team today and supports innovation for years to come.

- Enhanced network performance, reliability, and security across all sites
- Streamlined management through a consistent, well-documented architecture
- Improved Wi-Fi coverage and connectivity for employees and remote users
- Future-ready infrastructure designed to scale with the organization's growth
