

BUILDING A FUTURE-READY FOUNDATION: DUNN & DILL CPA'S IT JOURNEY WITH VIYU

A PARTNERSHIP BUILT ON TRUST AND STRATEGY

For over five years, Dunn & Dill CPA's has partnered with Viyu to create a strong, scalable IT foundation. They weren't just looking for a vendor—they needed a trusted advisor who could align technology with their long-term business goals. As a CPA firm entrusted with sensitive financial information, protecting client data and maintaining privacy was paramount throughout every technology initiative.

EVOLVING TOGETHER

As Dunn & Dill's business expanded, so did their IT needs. Together, we've achieved key milestones:

- **Enhanced Cybersecurity:** Implemented SOCaaS and next-generation antivirus to protect critical assets.
- **Cloud Transformation:** Transitioned on-premises storage to vArida, our secure, highly available cloud platform.
- **Modernized Communications:** Upgraded their legacy phone system to RC, improving UCaaS capabilities while reducing costs.
- **Strengthened Network Infrastructure:** Implemented enterprise-grade networking designed to prioritize security, performance, and application traffic.

Through these initiatives, our relationship evolved from service provider to strategic technology partner.

"Viyu has been more than an IT provider—they've become a trusted technology partner. Their strategic guidance has helped us modernize our infrastructure while keeping the security of our clients' information at the forefront."
