

CLOUD WITHOUT COMPROMISE: HOW DUNN & DILL CPA'S TRANSFORMED THEIR BUSINESS APPLICATIONS WITH VARIDA

CHALLENGE

Dunn & Dill CPA's had been operating on an on-premises server for several years to host their core business applications. While the system supported their needs, it also came with limitations such as dependency on local power and internet availability. As the hardware aged, it became clear that a more modern, reliable solution would better support the company's long-term growth and day-to-day operations.

Because Dunn & Dill is committed to protecting the privacy and security of its clients' sensitive financial data, safeguarding that information was a top priority throughout the migration.

SOLUTION

Viyu designed and executed a rapid migration to its secure vArida Cloud platform:

- Planned and deployed the migration strategy in under one week.
- Completed migration over a single weekend to minimize downtime.
- Transitioned all applications and data seamlessly, eliminating dependency on failing hardware.

OUTCOME

Dunn & Dill now operates in a highly available, SOC II Type II compliant cloud environment, with:

- Managed backups ensuring critical data safety and recoverability.
- Enhanced reliability and security, removing local infrastructure risks.
- Future-ready scalability, enabling business growth without major infrastructure costs.

With vArida in place, the company now runs on a stable, resilient foundation—free from outages and equipped for long-term success.
